

ELECTRICITY DOs & DON'Ts

DO

- USE UL Listed Surge Protectors only. A surge protector is necessary and is the required to be the proper equipment plugged into the building's electric outlet. Please have your equipment labeled.
- ANY Extension Cords used – Must be 14 gauge or higher, UL Listed and have (3) three prongs.
- We recommend purchasing a surge protector with a cord 10' or longer, so it can reach further into your booth.

DON'T

- DO NOT use loose or frayed cords or any equipment that is out dated
- DO NOT use Residential Cords or cords with outlets on two opposite sides or that have only two prongs
- DO NOT tie extension cords together
- DO NOT piggyback or create a daisy chain of power strips, surge protectors, and extension cords.
- DO NOT plug in a power strip to a power strip or an extension cord to an extension cord. Only one extension cord may be plugged into a power strip, not multiple. Do not let surge protectors hang, instead install them on a flat surface (floor or back of display). Make sure cords are firmly attached.
- DO NOT use any adapters
